Subject: UK response - Consultation on a new work item on Conformity to Type
Importance: High

Dear Jean-Francois,

Thank you for the opportunity to comment on this proposed new project.

The United Kingdom:

- * Supports the proposed CTT project
- * Would prefer it is either aligned with the existing EU system or is made sufficiently flexible to accommodate the EU system
- * Can see some rationale for carrying out the work within TC3/SC5
- * Would want the system to be able to stand alone even if made compatible with existing OIML Certificate Systems
- * Would not want the system to favour the Type Approval Body who has certified the instrument but be open to any appropriate notified body.
- * Believes the project should start by investigating existing systems and clearly defining the project scope so there is no confusion between market surveillance and conformity to type
- * Would want the voluntary status of the system to be clearly maintained

I hope this is of some help.

Best regards

John Goulding
